

iTrack

Merrimak's On-Line Asset Tracking System

Understanding your organizations' critical needs in keeping track of the capital assets, Merrimak has developed our own customizable web-based asset tracking system called *iTrack*. Utilizing the latest database technology, *iTrack* offers various unique features and benefits that can be customized to enhance your asset tracking capability.

Benefits and Unique Features:

- **Web Accessible** – Customers can access data 24/7 through any Web Browser.
- **General Access Security** - *iTrack* can only be accessed by authorized individuals with unique passwords.
- **User-Defined Security** - Within your organization, individual users can be given different levels of access to *iTrack* data.
- **Asset Search** - *iTrack* allows users to perform detailed asset searches based on multiple input criteria.
- **Customizable User-Defined Fields** - *iTrack* allows you to define a number of fields that are unique to the needs of your organization. Information in these user defined fields is accessible and updatable within *iTrack*.
- **Reports** – A number of report formats are readily available for viewing to meet your needs.
- **Downloadable Data** - Standard and customized reports or extracts are downloadable directly from the Web in various data formats (Excel, DIF, CSV, and TXT).
- **E-invoicing** - As an extension of *iTrack*, Merrimak offers highly customized electronic invoice billing to our customers.
